Review your essay after submission...

Submission History - FA2013-BIOL-2401 - Human Anatomy and Physiology I - Austin - INT - Temple College

hover over and click the color bar

clicking the color bar after the percentage will show you the originality report for your essay.
Notice the numbered flags in the text of the paper. These match the reported "copied" sources listed on the right.

This does not necessarily mean you copied the listed source, just that the text has a high degree of similarity to the listed source. Your instructor will have their own guidelines at which they become concerned. You as a student should strive to maintain as low a 'similarity' to other documents as possible.

The higher the degree of similarity, the more likely the essay was copied.

In this example the text highlighted in red looks quite similar to a section of a paper submitted by a Tarrant County student while the area in brown may have been copied from a website (scioly.org)
